

## tech-rider

What we need:

- 1 table, approx. 200cmx80cm
- 12 (!) free plug sockets
- 1 mic stand
- free Stereo channel for our Out-signal  
(we use our own mixer A&H Zed14, Main Out via XLR)
- 2x stereo monitoring (goes out via Cinch from our mixer)
- a safe space to store our equipment before and after the gig
- approx. 30 min build up time, and 20 min for soundcheck
- proper fog machine or hazer highly appreciated
